

The second installment of diesel

The second set, 26 tank cars, with 1317 tons of diesel, will arrive in Ungheni in the afternoon of Friday, April 5.

After the train arrives in Ungheni, the necessary customs and technical procedures will be carried out. Also, the train's bogies will be changed to allow it to move towards C?u?eni, to the oil base.

on Saturday, April 6, the denso-volumetric measurements and the taking of laboratory samples to determine the qualitative indices of diesel fuel will begin.

The Agency's representatives will work non-stop and on weekends, so that all procedures go smoothly and that the diesel arrives at its destination in optimal conditions.
